## OPIA Sheds light on the Future in an Age of Pollution

In a period of increased pollution and darkness, OPIA emerges with innovative recycling solutions, revolutionizing waste management and contributing to the creation of a greener planet for future generations.

JAN 2024

## Who are we:

Welcome to OPIA, a pioneering force in the global fight against pollution. At OPIA, our passion for environmental protection and dedication to technological advancements drive us to develop innovative recycling solutions with the power to revolutionize waste management systems. These solutions significantly reduce pollution levels, contributing to the creation of a greener and healthier planet for future generations.

## Our vision:

OPIA envisions a greener and healthier planet for future generations. We firmly believe that the key to combating pollution lies in changing our approach to waste management. Through the implementation of innovative technologies and the development of collective awareness, we strive to pave the way towards a clean and sustainable future.

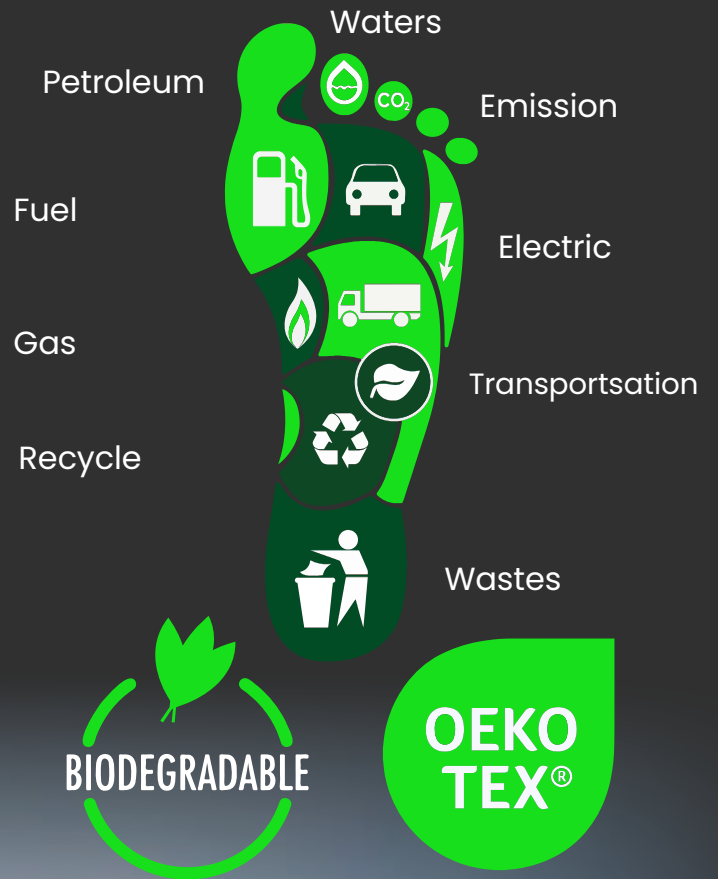

## Our Mission:

At OPIA, we lead the way in the fight against pollution by developing and implementing revolutionary recycling solutions. We are dedicated to providing a comprehensive and versatile approach to waste management. We strive to collaborate with governments, industries, communities, and environmental organizations to promote widespread change and foster a culture of responsible waste disposal.

## Our innovations:

Innovation lies at the core of everything we do. Leveraging the potential of modern technology, we have designed advanced recycling systems that not only reduce pollution levels but also contribute to the preservation of natural resources. Our cutting-edge solutions are carefully crafted to address the unique challenges posed by various types of waste, aiming to maximize resource recovery and minimize environmental impact.

# frigg™ fabric

Imagine a new convenience, nature-friendly, 100% recyclable, both single-use and multi-use, textile products that can be washed according to the type of usage. Presenting Frigg, with legendary features to complement textiles.

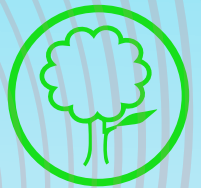

Frigg, with its front side being a blood repellent and the inner side having at least 48 hours of odor and sweat absorption, is a lightweight, temperature-controlled, new generation surgical gown for single-use. Additionally, it can be washed 20 times at 95° without losing its main features.

Uv and sound-absorbing Frigpg patient gowns protect you from stress.

Elegant and antibacterial, Frigg is a healthcare-friendly companion, always ready to protect you.

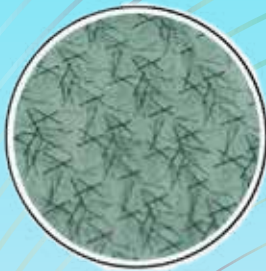

OPIV  
Group

Frigg, with its high-tech extraordinary features, provides infinite confidence with its unique touch.

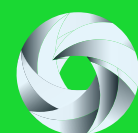

With its antistatic and antifungal properties, Frigg technology ensures comfort and peace of mind.

Frigg technology draws attention and provides self-confidence with its protective capabilities.

Frigg technology draws attention and provides self-confidence with its protective capabilities.

Frigg Technology, compatible with all types of printing and color models, reflects your personality.

With its anti-stain feature, Frigg technology prevents any unwanted marks.

Frigg technology offers diversity with various cutting and sewing styles.

Frigg technology offers diversity with various cutting and sewing styles.

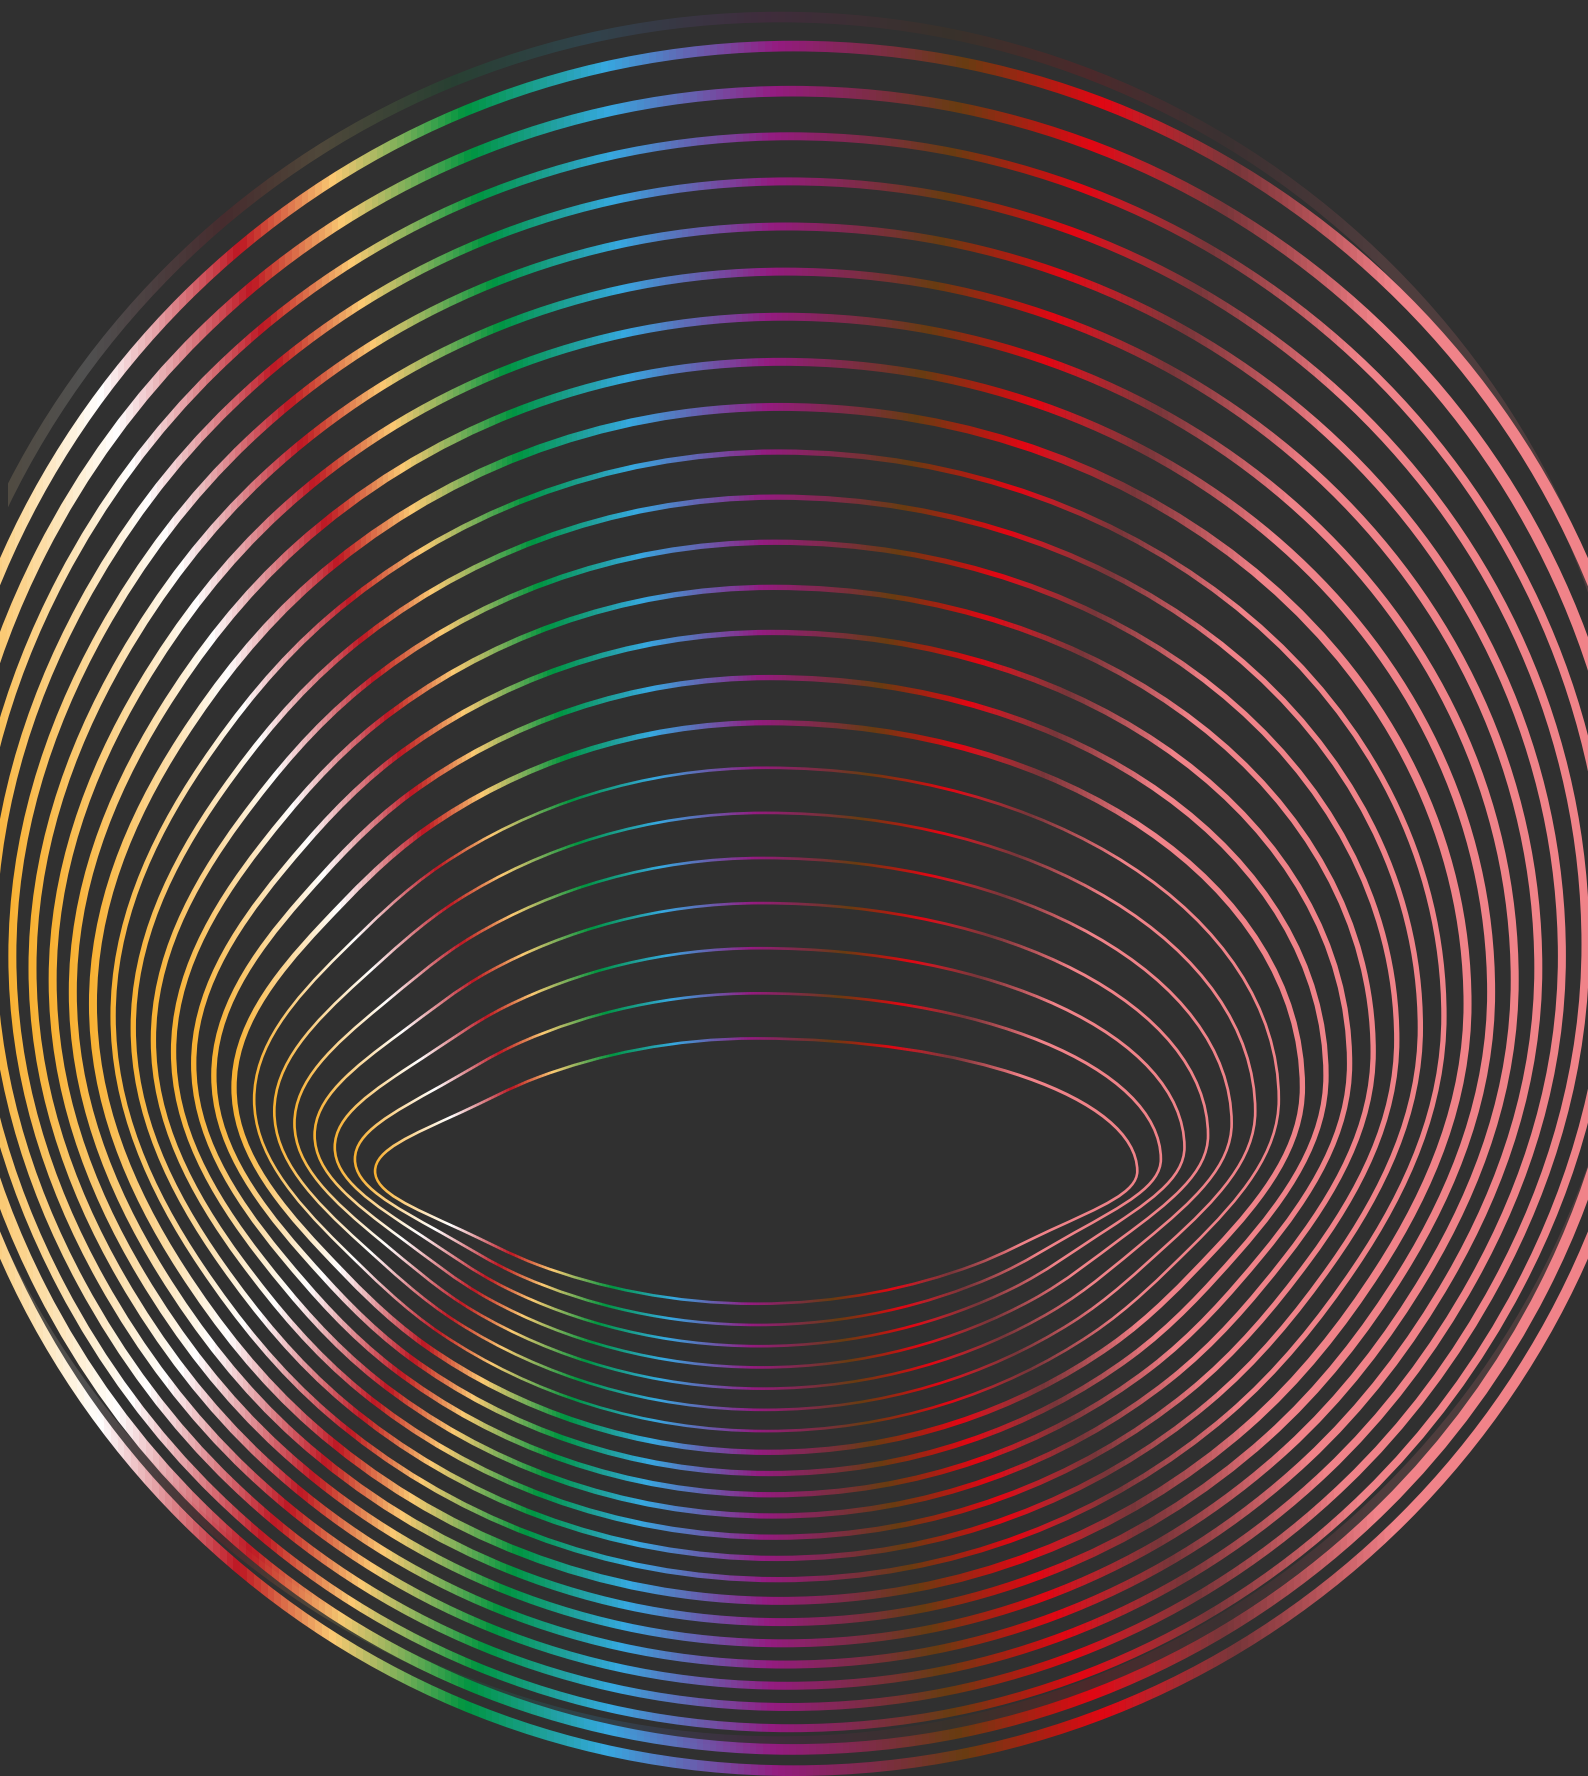

Its breathability and antistatic properties prevent itching and sweating.

# Home Linens

Protect your children from allergies and mites with Frigg technology.

OPIA  
Group

Say goodbye to restlessness with even heat distribution and wake up with a happy smile.

Adding value to our precious heritage, Frigg technology puts an end to urinary incontinence pads with its liquid-repellent and absorbent properties. It also protects sensitive skin and preserves our heritage.

Fits all types of pillows and spaces.

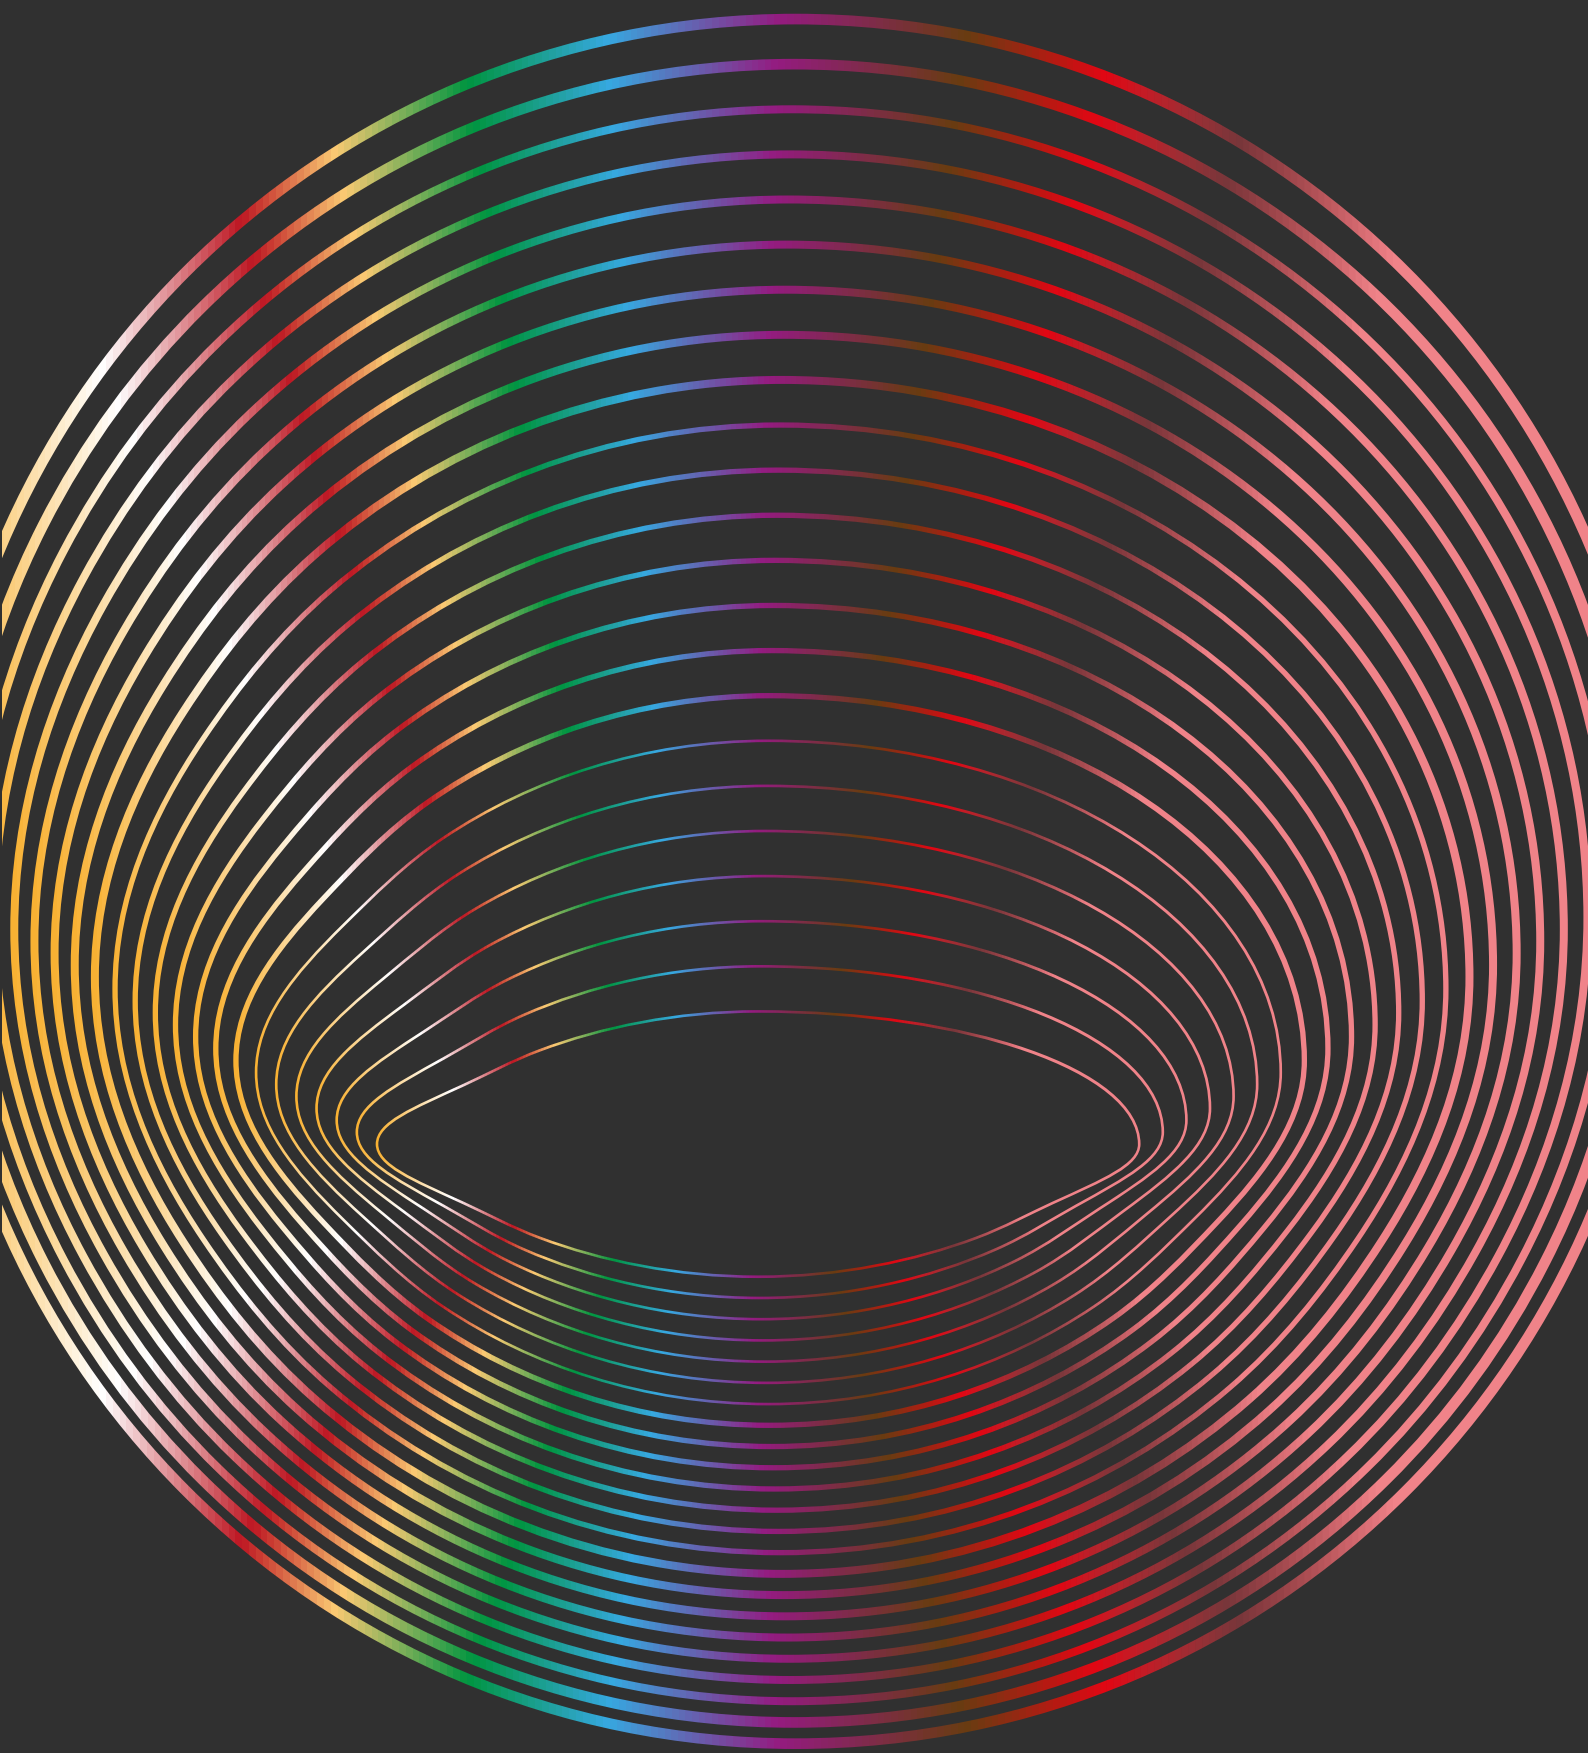

Frigg technology with eye-catching patterns ensures rapid drying with its super-absorbent feature, perfect for beaches.

# Summer Fabrics

It fits all types of models and cuts and is portable everywhere without taking up much space.

Stand out with lively and vivid patterns, along with super absorbency.

# Super absorbent bath towels

Its super absorbent feature not only traps sweat but also saves water during washing.

Some items are very valuable; Frigg's technology protects against UV, allergens, and is antimicrobial, guarding against fungi and bacteria.

It doesn't protect sensitive skin, but also shields against UV rays.

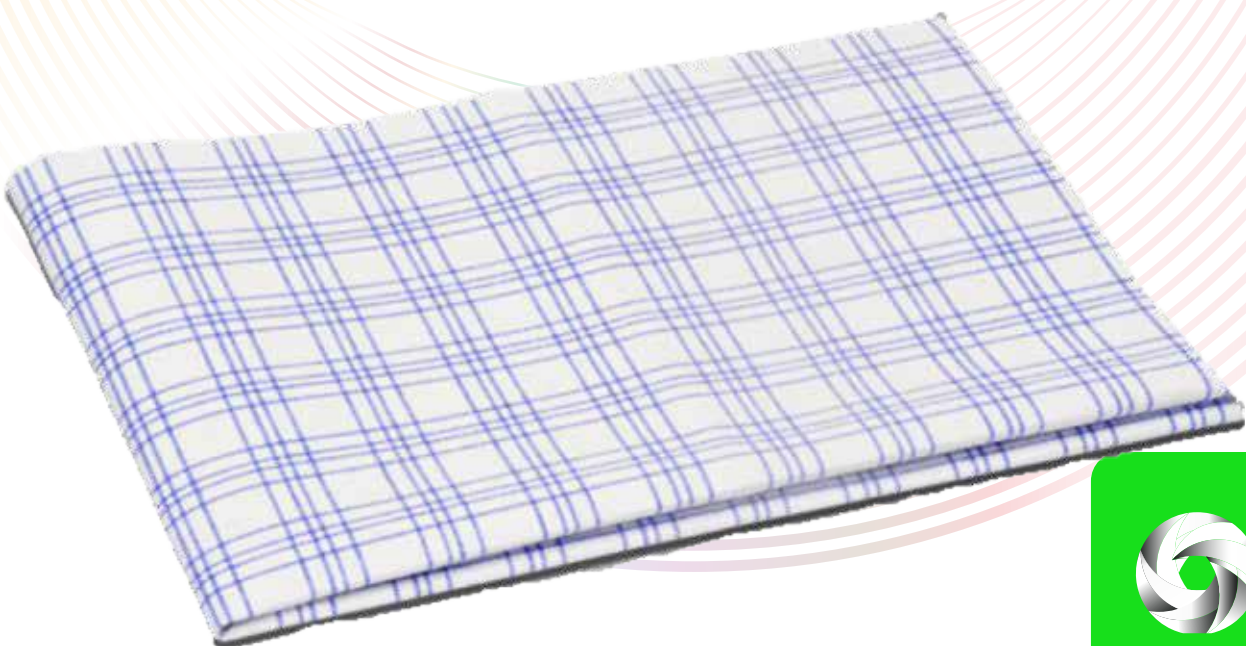

Its thousands of triangular microfilaments treat the skin gently while naturally capturing and eliminating dirt and other substances, thanks to Frigg technology.

A hero fabric that protects all devices with superior technology, preventing scratches, spills, dirt, and impacts.

OPIV  
Group

Like a strong and brave wolf, Conall fabric possesses the strongest technology in all environments.

OPIV  
Group

conall

Combining strength with design, color, softness, Conall is the first technical nonwoven fabric that protects healthcare professionals.

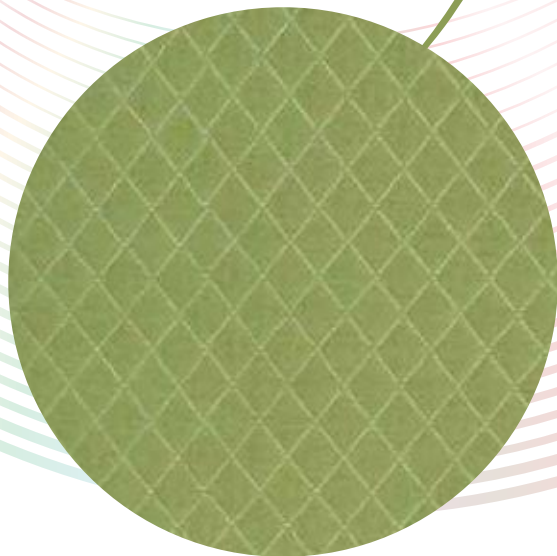

OPIV  
Group

Power and protection united, SSMMS+PE+S-punlace, the new nonwoven fabric, Conall.

EN 13751, the new favorite, Conall fabric, protects you, healthcare professionals, and is ready to consult with its various models for different usage areas.

Your smile is society's smile.  
Conall values that suit your  
worth.

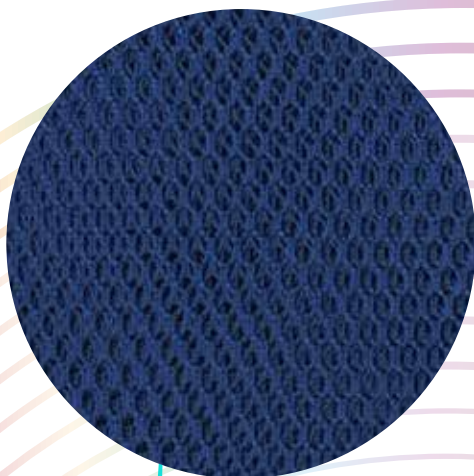

The most powerful nonwoven fabric, with a honeycomb pattern that is softer than textile fabrics, dazzling the eyes.

A different nonwoven fabric you have met so far, with its naturalness and cross spunlace technology, Conall.

Tested successfully for protective breathability, antistatic and antichemical features, Conall proves its strength under the management of the Ministry of Health.

A flame-retardant fabric with antimosquito feature, keeping all mosquitoes away. A new innovation in garden and pool areas, Conall.

Ask and you shall receive. We offer this powerful fabric to you, economical and long-lasting.

A fabric that is comfortable but modest, giving importance to inner beauty and modesty.

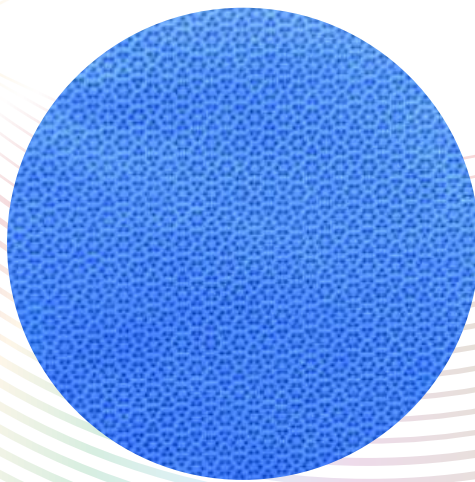

Suitable for all types of sewing and ultrasonic bonding.

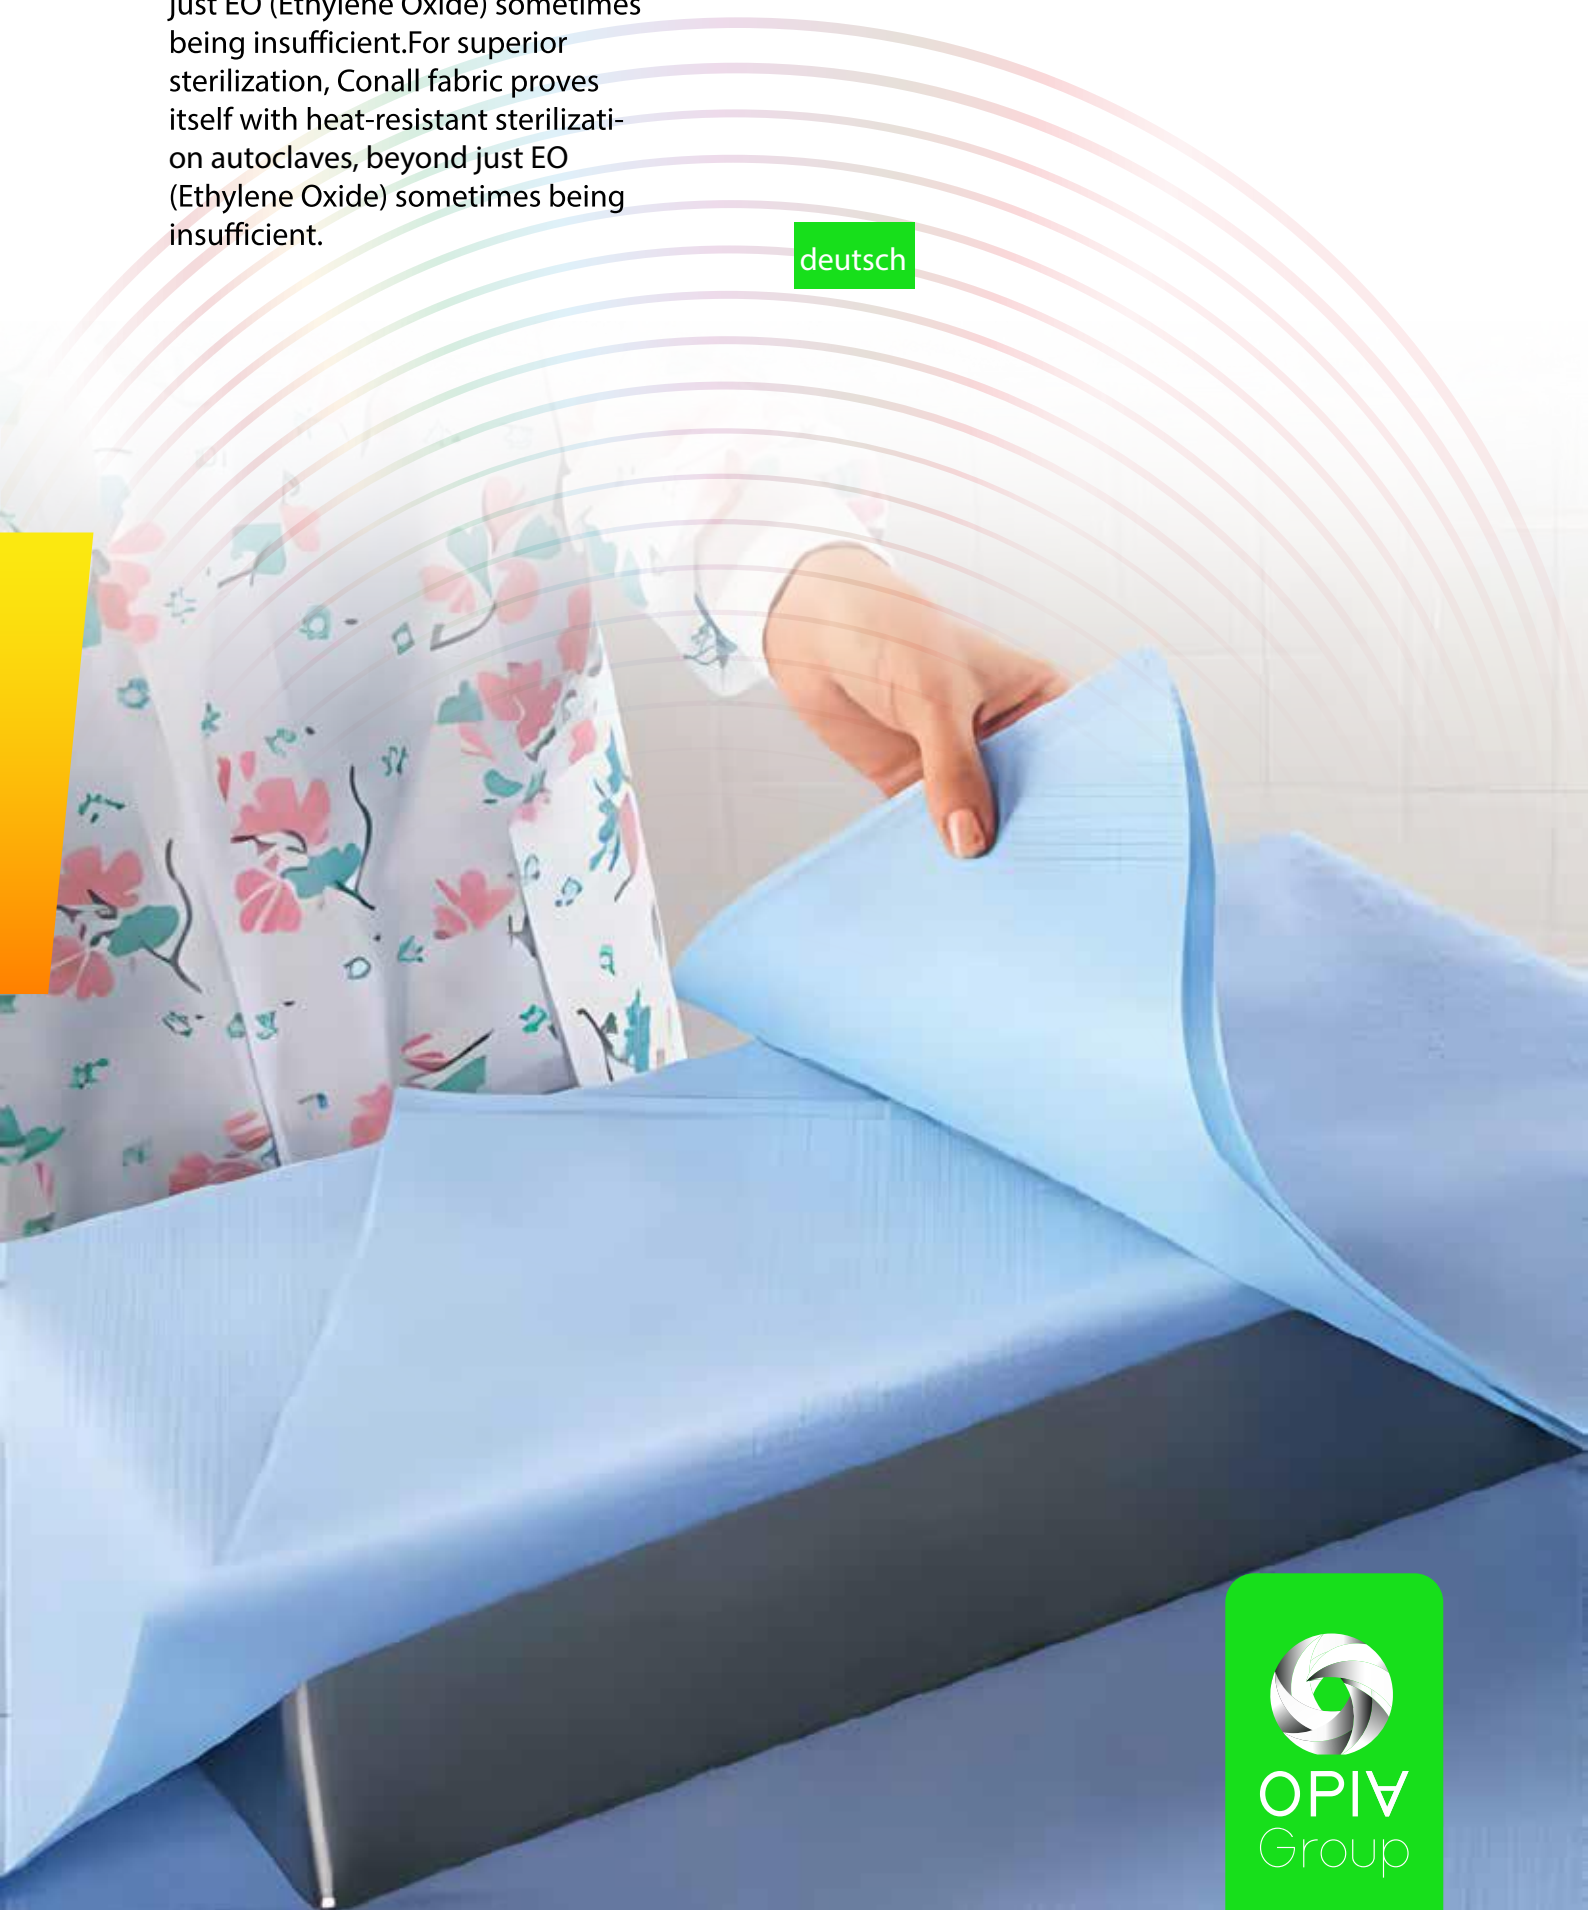

It does not show inward, and it respects privacy

For superior sterilization, Conall fabric proves itself with heat-resistant sterilization autoclaves, beyond just EO (Ethylene Oxide) sometimes being insufficient. For superior sterilization, Conall fabric proves itself with heat-resistant sterilization autoclaves, beyond just EO (Ethylene Oxide) sometimes being insufficient.
